

## STABILIZATION OF UV-SENSITIVE ACTIVE INGREDIENTS

### Abstract of the Disclosure

Cosmetic and dermatological formulations containing at least one UV-sensitive active ingredient have increased UV protection and have the active ingredient stabilized against decomposition through addition of at least one dialkyl naphthalate of the structural formula

wherein R<sup>1</sup> and R<sup>2</sup> are selected independently of one another from the group consisting of branched and unbranched alkyl groups having between 6 and 24 carbon atoms, and at least one emulsifier, selected from the group consisting of phosphate and sulphate emulsifiers.
